

GLV - GRAMPO DE LINHA VIVA

GLV - HOT LINE CLAMP

Grampo de linha viva fabricado em liga de cobre ou alumínio, de alta resistência mecânica. Superfície de contato com o cabo principal desenhada de forma a minimizar os efeitos de esforço de torção do grampo na instalação ou retirada.

Hot line clamp in cast copper alloy or aluminum versions. Run conductor contact are designed to minimize twist stress during installation or removal.

GPB - GRAMPO PARALELO EM BRONZE

GPB - PARALLEL BRONZE GROUNDING CLAMP

Fabricado em bronze de alta condutibilidade elétrica, resistência mecânica e à corrosão. Acomoda uma larga faixa de bitolas em quaisquer das canaletas, reduzindo o estoque ao mínimo. As garras laterais intercalam-se proporcionando um aperto firme com amplo contato. Ressaltos de trava para cabeça de parafuso permite a instalação com apenas uma ferramenta.

Made of high conductivity, high mechanical strength and corrosion resistant bronze. Range taking for less inventory. Especially designed for higher grip and larger contact area. Installation takes a single wrench.
