# 2P Ark•Gard<sup>®</sup> ENR Series

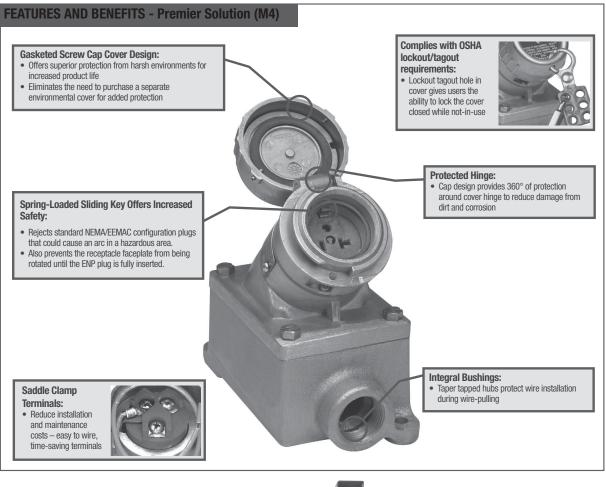

#### **Premier and Value Series**

#### Ark•Gard<sup>®</sup> Premier Series:

• The premier line of ENR Receptacles (M4) come equipped with exclusive features that increase the life of the product, reduce maintenance costs, and eliminate the need to purchase costly replacement parts. There is no other product offering on the market today that comes equipped with time-saving saddle clamp terminals or the added safety of a lockout/tagout hole. The premier ENR Receptacle Series is the ideal solution for applications where increased safety and reliability are critical.

#### Ark•Gard<sup>®</sup> Value Series:

• The value line of ENR Receptacles is the ideal solution for rugged and industrial NEMA configured applications up to 20 amperes. Like the premier line, this product comes equipped with built-in safety features that reject standard NEMA configuration plugs that could cause an arc in hazardous areas.

FEATURES AND BENEFITS - Traditional Value Solution
To make connection, simply insert the ENP plug and rotate to close the circuit
Built-in features cause the ENP plug to become locked in the receptacle and cannot be accidentally disengaged while in use

Crouse-Hinds

# **ENR Value Series Dead Front Interlocked Circuit Breaking Receptacles**

#### **ENP Plugs**

# **Applications:**

- ENR receptacles and ENP plugs are used: • With portable electrical equipment such
- as compressors, tools, lighting systems, and similar devices
- In areas made hazardous by the presence of flammable vapors and gases or combustible dusts
- Wherever portable electrical equipment is likely to be transferred from hazardous to non-hazardous areas
- · In damp and corrosive areas
- · When power requirements do not exceed 20 amperes
- · Where general purpose application is required

#### **Features:**

- Ark•Gard 2 receptacle incorporates three spring-loaded slide keys that prevent the receptacle face plate from being rotated until the ENP plug is fully inserted into the receptacle. To make the connection, the ENP plug is fully inserted, and the receptacle face moved inward by pushing the plug forward. The plug is then rotated, closing the circuit. As rotation begins, the plug becomes locked in the receptacle and cannot be accidentally disengaged. In making or breaking the circuit, any resulting electrical arc is confined in the factorysealed chamber.
- · Factory-sealed chamber encloses the potential arcing components between two explosionproof threaded joints. These threads are specially coated to guarantee freedom of movement, which ensures on-off action. No additional seals are required.
- One piece molded gasket seals cover plate and ENP plug when plug is inserted, providing full environmental protection at the receptacle face.
- Top-hinged cover design with 45° downward angle provides superior protection in damp, wet, and dirty locations.
- · Field assembly is accomplished with standard tools
- Use standard EDS back boxes.

by F:T·N

†Receptacle units alone (i.e. ENR5201) are not suitable for Class I, Group B.

Cl. I, Div. 1 & 2, Groups B+, C, D Cl. II, Div. 1 & 2, Groups F, G CL III

NEMA 3, 7BCD, 9FG, 12

# **Certifications and Compliances:**

- NEC:
  - Class I, Division 1 and 2, Groups B<sup>+</sup>, C, D Class II, Division 1 and 2, Groups F, G Class III
- ANSI/UL Standard 1010
- NEMA/EEMAC 3, 7BCD, 9FG • CEC:
  - Class I, Division 1 and 2, Groups B, C, D Class II, Division 1 and 2, Group G Class III

#### Standard Materials:

- Receptacle housing and spring door die cast copper-free aluminum
- Interior Krydon® fiberglass-reinforced polyester material
- Contacts: receptacle blade brass; receptacle switch - silver
- · Receptacle cover hinge pin and spring stainless steel
- Receptacle gasket neoprene

### Standard Finishes:

- Copper-free aluminum aluminum acrylic paint
- Brass natural

Explosionproof

Raintight

**Dust-Ignitionproof** 

## **Electrical Rating Ranges:**

 Receptacles: 15 amperes; 125 VAC and 250 VAC, 50-400 hertz 20 amperes; 125 VAC and 250 VAC, 50-400 hertz

## Grounding:

• NEC Article 501 and CEC Section 18 requires that metal frames or exposed non-current-carrying metal parts of portable devices used in hazardous locations be grounded through an extra conductor in the portable cord. ENR Receptacles and ENP Plugs are provided with an extra grounding pole.

CAUTION: To reduce the risk of ignition of hazardous atmospheres, do not use plugs or receptacles in Class II, Group F locations that contain electrically conductive dusts.
