

CABLE LUGS & WIRE CONNECTORS

INTRODUCTION TO CABLE LUGS AND CONNECTORS

Cable lugs are used for connecting the cables/wires to electrical appliances, other cables, surfaces, or mechanisms. These Lugs are usually used when permanent, direct-fastening methods are not feasible or not required.

Raychem RPG manufactures cable lugs and connectors, which provides termination for a variety of power and grounding applications with innovation and reliability. These lugs and connectors are made of high strength, high conductivity electrolytic copper and aluminium alloy materials to provide optimum connectivity for power and grounding applications.

Features of Cable lugs and connectors

- Our lugs and connectors are safe and economical both in design and use
- All copper lugs and connectors are electro-tinned to inhibit corrosion and oxidation
- Entry to terminal is shock proof and flared end is provided in selective lugs for easier conductor entry in flexible cables
- The terminals of our lugs and connectors are designed for easy insertion of standard wires and for flexible wire insertions the barrel end is made bell mouthed (flared)
- Our lugs and connectors are annealed to guarantee optimum ductility

Our lugs and connectors are manufactured from Cathodes sourced from LME approved warehouse. Our Aluminium lugs are manufactured from ISO certified tube manufactures. We have inhouse facility to check conductivity of aluminium and copper. Copper Specifications 97% IACS, BS EN 1976: 1998, BSEN 1978:1998. Copper finish: Electrotinned to BS 1827: 1984.

Our Offerings

- Our cable lugs and connectors meet the highest quality requirements and satisfy the required international standards.
- We have an extensive range for low and medium-voltage applications
- We offer distinct phase for easy conductor entry and burr-free edges
- Our products provide with consistent precision, high safety and rating properties, thanks to high quality electrolytic copper that we use.

WHY RAYCHEM RPG

Quality

At Raychem RPG, quality is a long history of success and recognition. Today the company is one of the Indian businesses to have adjusted and certified its progress according to strict regulatory standards:

- Quality (ISO 9001 : 2008)
- Environment (ISO 14000)
- Safety (OHSAS 18001)

Production Control

In order to guarantee our products high quality standards, the production process must be monitored with constant and careful precision. The control phases accompany all the stages of production and often use advanced technology for measurement and detection. We use the cutting edge CNC machine for all our manufacturing operations related to Cable lugs to maintain the world class standard of Raychem RPG.

Care for Environment

Raychem RPG believes that industrial development can truly respect, and therefore be compatible with the environment. For Raychem RPG, protecting the environment and the people and things around you is an important responsibility that requires constant and immediate consideration. It is a conscious decision which involves believing in the future.

Competitive Enterprise

One of Raychem RPG's aims is knowing how to offer its users best possible solution in consideration of the quality-price ratio. The fact that thousands of clients all over the world are faithful to Raychem RPG products demonstrates the technical and economic validity of the solution offered.

Global Capability

The company's sales network is one of its strengths. It enables Raychem RPG to be present on all the main global markets consequently being as closely as possible to the end customer. The company has its presence in South Africa, Qatar, Russia, Kazakhstan and the UK. This direct access to each market allows the Raychem RPG staff to remain inside the market with the advantage of being closer to the client.

OUR STANDARDS

Specialized Solution For Every Application

- Compliance with international standards, including IEC and UL.
- Solutions for cables with compacted round conductors, cables with sector-shaped conductors and to suit individual requirements.
- Plus all corresponding manual and hydraulic crimping tools.

Benefits:

- The right products for every installation scenario.
- Highest flexibility for connecting cables.
- Standards-compliance permits international application.
- A single source for everything – from cable lugs to tools.
- Guarantees the correct tools for professional electrical installations.

High Tech CNC M/c Processing

- Raychem RPG tubular cable lugs are made from quality E-Cu tubes. All suppliers are certified.
- Defined, unique material properties by annealing cable lugs.

Benefits:

- Optimised conductivity, enhanced safety and high cable lug rating thanks to high quality material.
- The annealing of cable lugs during production sets Raychem RPG products apart and guarantees outstanding processing properties such as a defined hardness and tooling operations with reduced effort and less wear of tools.

Heavy Duty Applications & Performance

- Consistent material thickness, precise diameters and accurate fit mean optimised processing and ultimate reliability.
- Tested to DIN EN 61373 Class 1B "Railway applications".

Benefits:

- With professional installation of the correct types, optimised stability even with mechanically stressed or strong vibrating connections.
- Less repair and maintenance.
- Safe connections even under high load, e.g. in public transport services.

PRODUCT APPROVAL

IEC 61238 APPROVAL

Raychem RPG Terminal Lug and Copper Lugs are tested according to "Class A" of IEC61238-1 for rated voltages upto 30kV (Um=36kV)

Scope and object of IEC61238-1

Compression and mechanical connectors for power cables for rated voltages up to 30kV(Um=36kV),e.g. buried cables or cables installed in buildings, having conductors complying with IEC60228 and IEC60228A with cross-sectional areas 10mm² and greater for copper and a maximum continuous conductor temperature not exceeding 90°C.

Class A

These are connectors intended for electricity distribution or industrial networks in which they can be subjected to short-circuits of relatively high intensity and duration. As a consequence, Class A connectors are suitable for the majority of applications.

Depending on the application, the connectors are subjected to the following tests :

Heat Cycle Test - The object of the heat cycle is to determine the reference conductor temperature to be used for subsequent cycles and also to identify the median connector.

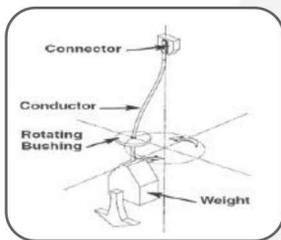

Total 1000 cycles required.

Short-circuit test. Six short-circuits are applied after the 200th heat cycle. The short-circuit current level shall be such that it raises the bare reference conductors from a temperature of $\leq 35^{\circ}\text{C}$ to a temperature between 250°C and 270°C . The maximum temperature, time and approximate current, or the actual current and time, used for the short-circuit test, shall be recorded and stated in the test report.

Mechanical Test: The conductor lengths, between connector and tensile test machine jaws, shall be $\geq 500\text{mm}$. The rate of application of the load shall not exceed 10N per square millimetre of cross-sectional area and per second up to the value in copper :maximun 20000N, which is then maintained for 1 min.

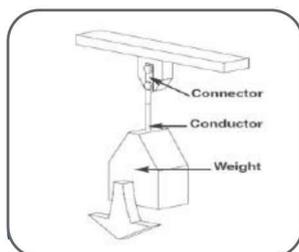

UL 486A & 486B Approval

Raychem RPG Terminal Lug and connectors comply with UL Standard requirements and they have been carried out the tests according to UL486A and UL486B.

Test 1 - Wire Secureness Test -

The object of this test is to get long term dependability in Raychem RPG copper lugs and connectors with moving equipment.

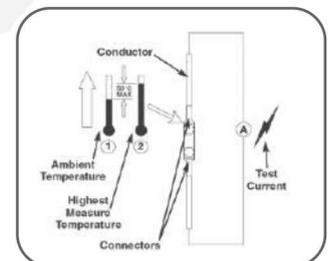

Test 3 - Wire Pullout Test

The object of this test is to Secure connection under static tensile Loads. Wire Pullout Test Sequence

Test 2 - Static Heating Test

The object of this test is to get long Safe Connection at Rated Current`
Static Heating Test Sequence

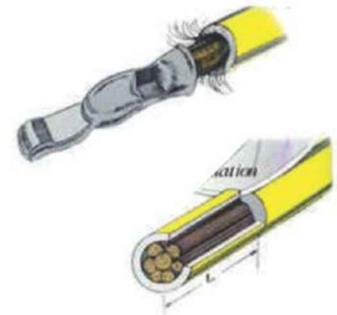

CRIMPING METHODOLOGY

The following are a series of procedures that Raychem RPG suggests maintaining and extending the performance life of connectors.

COPPER LUG CRIMPING

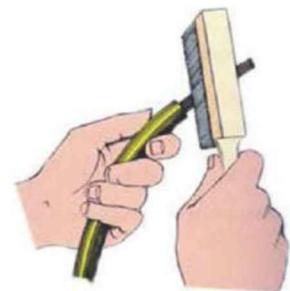

1. STRIPPING CABLE INSULATION

Problems with cable harness and connector systems often begin with improper or accidental cutting of wire strands while stripping cable insulation. Each strand is important, and all of them must be included in the contact barrel to avoid unnecessary hot spots during operation. When removing insulation, position a sharp blade at a right angle and apply steady, controlled pressure, cutting only the cable insulation, not the copper wire. Strip cable to the proper length for the contact being crimped. Proper lengths are listed in the instruction sheet.

2. CLEANING COPPER WIRE

Aged and badly tarnished copper should be thoroughly scraped with a brush which penetrates the entire bundle cleaning every strand. The wires will then be ready for insertion into the contact barrel when they are brushed to their original bright copper finish. Contact barrels are lined with silver or tin plating to assure consistent conductivity, which will be reduced if the barrel is crimped around aged or tarnished wire.

3. CRIMPING

The best preparation will be defeated if inadequate tools or improper crimping procedures are performed. Never use a hammer and chisel or the "squeeze in a vise" method. They won't do the job and will result in substantial reduction in connector life.

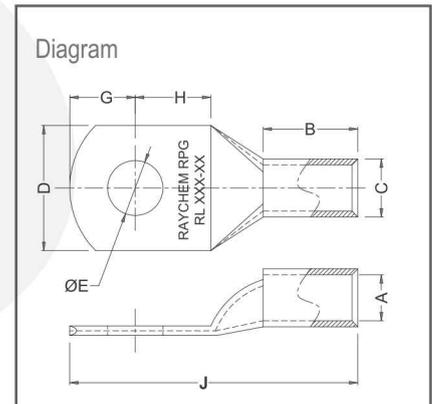

Use a crimp tool. Make sure the stripped cable is inserted all the way into the barrel of the contact and that the contact point is centered in the crimp tool. A crimp tool will effectively compress the contact barrel tightly around the cable strands, allowing them to be pressed tightly against each other and against the inside wall of the contact barrel.

When the crimp has been completed, check the appearance of the contact. A properly crimped contact barrel is compacted tightly with the outer strands. The outer strands on an improperly crimped barrel will be loose and will not have adequate clamping force. Test for low pull out force. If the cable can be loosened, recrimp until it is tight.

FEATURES

- With inspection hole to ensure full cable insertion
- Tin plated copper lugs to improve electrical conductivity and avoid oxidation of copper
- Annealed material optimizes material and crimping properties
- Flat contact surface and precise stud holes as per the Metric standard
- Chamfered mouth for easy cable insertion
- Can be available with /without inspection window

* WITHOUT STUD HOLE
UL NOT AVAILABLE

- ### FEATURES
- Durable lugs for light duty application
 - With inspection hole to ensure full cable insertion
 - Tin plated copper lugs to improve electrical conductivity and avoid oxidation of copper
 - Annealed material optimizes material and crimping properties
 - Flat contact surface and precise stud holes as per the Metric standard
 - Chamfered mouth for easy cable insertion
 - Can be available with /without inspection window

FEATURES

- Bell Mouth Structure provides easy insertion for stranded copper cables
- With inspection hole to ensure full cable insertion
- Tin plated copper lugs to improve electrical conductivity and avoid oxidation of copper
- Annealed material optimizes material and crimping properties
- Flat contact surface and precise stud holes as per the Metric standard
- Chamfered mouth for easy cable insertion
- Can be available with /without inspection window

FEATURES

- Heavy Duty lugs for transformer application
- Facilitates good heat dissipation!
- With inspection hole to ensure full cable insertion
- Tin plated copper lugs to improve electrical conductivity and avoid oxidation of copper
- Annealed material optimizes material and crimping properties
- Chamfered mouth for easy cable insertion
- Can be available with /without inspection window

NARROW PALM CABLE LUGS

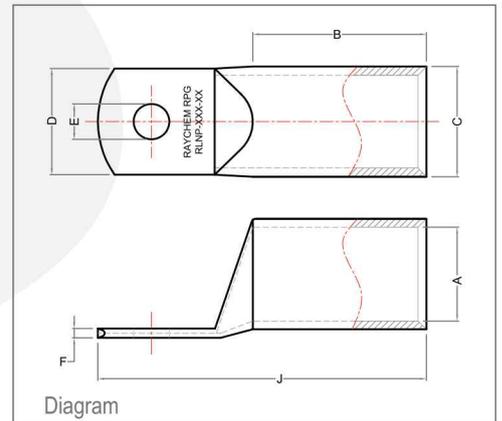

FEATURES

- Specifically developed for application on circuit breakers with reduced space terminal blocks
- Ensures immediate and easy installation of wires
- With inspection hole to ensure full cable insertion
- Tin plated copper lugs to improve electrical conductivity and avoid oxidation of copper
- Annealed material optimizes material and crimping properties
- Chamfered mouth for easy cable insertion

Long Barrel Lug

Diagram

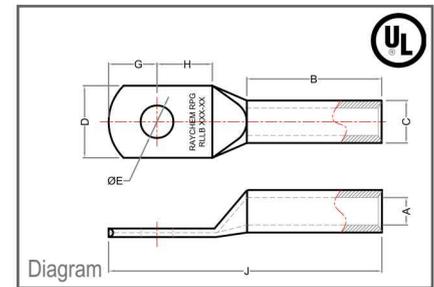

FEATURES

- Longer length barrel permits extra crimps for additional assurance on heavy duty loads.
- Seamless, one piece, copper construction with tin plating assures maximum conductivity.
- Generous entrance chamfer provides easy cable insertion.
- Can be available with /without inspection window.

Crimp Type Lug (DIN 46235)

Diagram

FEATURES

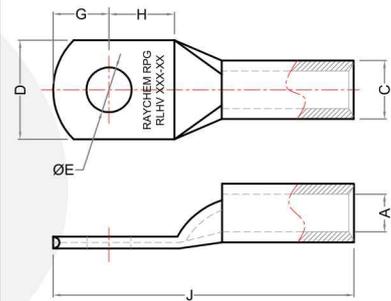

- Lugs as per DIN46235 Standard
- Tin Plated to inhibit corrosion
- Material - Electrolytic Copper
- Enclosed barrel prevent corrosion material from entering barrel when used in harsh environment

Lug-33kV application

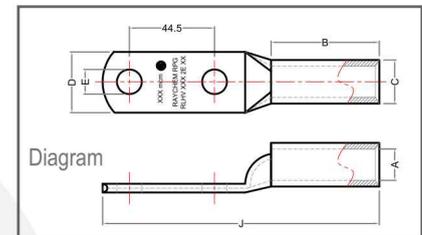

Diagram

FEATURES

- HV lugs are specially designed to withstand high voltage applications upto 33 KV.
- Manufactured from high quality copper tube, annealed and tin plated
- With inspection hole to ensure full cable insertion
- Chamfered mouth for easy cable insertion
- Can be available with /without inspection window

FEATURES

- 2 Hole heavy duty lugs are best suited in application where two bolts are needed to avoid rotation or movement of the lugs.
- They are used for heavy duty industrial application requiring mechanical strength
- Tin plated copper lugs to improve electrical conductivity and avoid oxidation of copper
- Flat contact surface and precise stud holes as per the Metric standard
- Chamfered mouth for easy cable insertion
- Can be available with /without inspection window

FEATURES

- Lugs as per Australian Standard
- Inspection Window to visually assure full conductor insertion
- Flared entry prevents bent back strands when inserting fine strand conductor into barrel
- Tin Plated to inhibit corrosion
- Material - Electrolytic Copper

Lugs (Australian Standard)

EUROPEAN INSPECTION AND CERTIFICATION COMPANY S.A.

CERTIFICATE OF CONFORMITY

FULLNESS EXAMINATION OF TECHNICAL FILE

Certificate No.: IN.CE.EU.153/15
Issue Date: 19/08/2015
Expiry Date: 18/08/2020
Applicant (Name & Address): RAYCHEM RPG PVT LTD
 RPG HOUSE 463 , Dr Annie Besant Road
 Worli ,Mumbai 400030
Manufacturer (Name & Address): Raychem RPG Pvt. Limited , Plot No. 9, S.No. 62,
 Hissa No 2 & 3, Near Bharat Petroleum pump,
 Off Western Express highway, Valiv village
 Post Sativali, Vasal (E) -401208 , Maharashtra, India
 Mobile : +0091-9920481130, Landline : +91-250-3057775
TCF No.: RRPL/TCF/Copper lugs/PA/01/00
MODELS: Refer Annexure
Directive(s): Low Voltage Directive 2006/95/EC
Standard(s): IEC / EN 61238-1:2003

This is to certify that, upon the relevant application of RAYCHEM RPG PVT LTD , EUROCERT as Third Party Authority has reviewed the Technical Construction File of the described product which found to fulfill the basic health and safety prerequisites of above mentioned Directive(s).

Note:

- The manufacturer should issue a Declaration of Conformity according to the basic requirements of the applicable and relevant directives.
- The CE marking can be affixed on the above mentioned product with the manufacturer's responsibility, if all relevant and applicable directives are complied with.
- All modifications to the Technical File should be first submitted to the Third Party Inspection Authority to ensure further validity of this attestation.
- This certificate is valid only for the product and configuration described and in conjunction with the technical data detailing.

Third Party Authority Stamp

TEST DISCIPLINE: ELECTRICAL	
General details	
Customer / Applicant	Raychem RPG (P) Ltd. Vasai International Business Division, 1/52, M.G. Road, Near Bharat Petroleum, Waly Village, Post-Sativali, Vasai (E) - 401 208, Maharashtra, India
Manufacturer	Raychem RPG (P) Ltd. Vasai International Business Division, 1/52, M.G. Road, Near Bharat Petroleum, Waly Village, Post-Sativali, Vasai (E) - 401 208, Maharashtra, India
Program	Others
Test Lab Location	(a) UL Bangalore Refer to Cover page for the UL address
Item Under Test	Copper Cable connector and Ferrules - long barrel
Model	RCL 25
Number of Samples	1
UL Sample Identification	1875881-1 to 7 Refer Summary of Test results for multiple samples
Manufacturer Serial Number (if any)	-
Condition of IUT on receipt	Good
Date of Receipt	15 May 2014
Applicable Standard	IEC 61238-1; Compression and mechanical connectors for power cables for rated voltages up to 30 kV (Um = 36 kV)
Number of pages	19 pages
Date of Testing (Start date)	9 April 2015
End Date	27 May 2015
UL general^ ambient condition	Temperature in °C: 23 ± 5°C Relative humidity in %: < 70%
Date of Reporting	24 June 2015
Test In-charge	Venkateswara S
# Fill in the rows with information or add hyphen (-)	
 Lab Technician	 Lab Manager
Test In-charge	Authorized signatory
Dimension verification:	
Cat. No.	RCL 25
Sample Number	1875881 7
Observation Results	Sample dimension verified with diagram. Not found deviation P
Tested by signature	
Page 8 of 19	

TEST DISCIPLINE: ELECTRICAL	
General details	
Customer / Applicant	Raychem RPG (P) Ltd. Vasai International Business Division, 1/52, M.G. Road, Near Bharat Petroleum, Waly Village, Post-Sativali, Vasai (E) - 401 208, Maharashtra, India
Manufacturer	Raychem RPG (P) Ltd. Vasai International Business Division, 1/52, M.G. Road, Near Bharat Petroleum, Waly Village, Post-Sativali, Vasai (E) - 401 208, Maharashtra, India
Program	Others
Test Lab Location	(a) UL Bangalore Refer to Cover page for the UL address
Item Under Test	Copper plam Terminal lug
Model	RL 240
Number of Samples	1875875 - 7
UL Sample Identification	1875875 - 1 to 7 Refer Summary of Test results for multiple samples
Manufacturer Serial Number (if any)	-
Condition of IUT on receipt	Good
Date of Receipt	15 May 2014
Applicable Standard	As per customer requirement test procedure followed as per IEC 61238-1; Compression and mechanical connectors for power cables for rated voltages up to 30 kV (Um = 36 kV)
Number of pages	19 pages
Date of Testing (Start date)	7 November 2015
End Date	15 June 2015
UL general^ ambient condition	Temperature in °C: 23 ± 5°C Relative humidity in %: < 70%
Date of Reporting	24 June 2015
Test In-charge	Venkateswara S
